

2026 God the Father Jesus Christ and my Brethrens

Eli DeJure

Draft for Consultation

its okay Noel, im glad you're doing okay

since new year ive been battling the sinful flesh/self and the fruits of the flesh listed in galatians 5 that are being influenced by satan and his demons

24/7 its tiring, so far what i have from the fruit of spirit is self control, meekness i try gentleness, especially longsuffering, and building faith

what i lack is peace, joy
i dont know about love but i do have the spirit of being considerate

oooooooooooooooooooo

Hey buddy, can you elaborate on what youre going through?

oooooooooooooooooooo

let me see if i can elaborate on it more

according to the scriptures we have our sinful flesh and has the fruits of the flesh which are, adultery, fornication, lust, strife, sedition, envy, jealousy, hatred, anger, wrath and then other emotions and mental processes like greed, gluttony, possessiveness, confusion, anxiety, fear, annoyance, complaining, laziness towards righteousness, criticism and judgement and tainted perception, and "me vs them", "im not among them" and so on

now these are being triggered by the demons, devil, satan (so you cannot fully trust yourself when its being ruled by the darkness and evil but only that you have which the spirit and it also has its own fruits or signs to know whivh part of yourself it is which are love, patience, longsuffering, peace, meekness, self control, joy, gentleness, goodness)

this is what ive been going through almost 24/7 since new year of 2026 that ive been moderating and policing every second or minute of the whole day and whats scary is the subconscious mind letting these things in while i sleep mostly at times about lust, adultery, strife, sedition

i forgot to add pride as the scriptures also warns about it

now thats the first part of the problem for myself, but my problem is not just for myself but also affects all the people that are connected to me telepathically as they can in realtime experince all the ups and downs and randomness of my mind, thoughts, doubts, anxiety and heart. thats the second problem which i state in the first message that i wonder if i have love but i do know i have consideration to acknowledge im affecting badly not just myself but other people as well that are connected to me telepathically

additional things i may add are, the demons, devil, satan and my sinful flesh are using my imagination against me as well like forcing me to see a female church member i know and it stays there and i have to rebuke it and repent before i commit adulteration which the evil darkness will have me do

and then other ones are manipulating my emotional trend and train of thoughts and or memories for me to commit stupid judgement and or have a tainted perspective about something, someone, or a memory, and or bring me into a negative emotional state

all these ive mentioned and also about forgetfulness and me having a short attention span and or distracted within my thoughts that i cant have a decent read time, watch or listen to something, or be in a concersation with others and or even study and or work properly because of all these things that the evil darkness does to me that i have to police every time

i also have to remove ritualistic in Jesus Christ name the memories i have that the evil darkness may use against me and also affect the people im connected to telepathically

also about the people im connected to telepathically, i cannot hear theirs thoughts, train of thoughts, emotions and such.. they have to convey and send me the message or their thoughts verbally, sometimes discreetly that only we know we are talking with each other in public or even when im at home and a loud conversation commences outside but we know it is being made known to me and i have come to know these things how they communicate with me because especially when they get angry with my thoughts in realtime present moment that i am having those train of thoughts back when i was still more ignorant on what goes in my head

this is different than hearing voices in my head and i know when im hearing voices in my head like out of the air i heard the devil satan loudly near me talking about me and dad, his commentaries he has and he was talking to someone or a group or when he was commenting with someone how bad of a person i am to meddle and offer spiritual help to another to be more closer with God the Father Jesus Christ

now with all i said, what i also do is try to read more of the scriptures, know more of God the Father Jesus Christ, praise Him, follow and remember His commandments like the first and second commandments, and i try to remind myself and tell myself i am connected with everyone that is connected to me and that i can trust in people and if one or more of them shows signs of or acting in the wicked sinful flesh, i will forgive.. so with others i try to have 3 principles: im connected to them, i trust them, and i will forgive as i am told to by God the Father Jesus Christ

now with all these, what i further seek is how to further crucify the sinful body self for my sake and for those who are connected to me as it is tiring and why im willing to undergo psychological and or medical treatment to subdue and crucify the sinful body that the evil darkness is trying to further influence

the evil darkness hits subconsciously not just consciously thats why its scary because with all the bombardment im policing, im subliminally being programmed to be what i fear and am policing, which i ask God the Father Jesus Christ for help

the early weeks before i feel my head with numbness and energy pressure on my third eye, on the sides of my forehead like i have horns, and above where the halo is... sometimes it was intense

and then other experiences i have is like my brain is failing or dysfunctional and it affects me mentally and physically and that my body either trembles and or my arms become stiff like

nowadays its just a headache on the left part of my forehead like i have a horn on my left side of the forehead

i forgot to say i do the Lord's prayer and other such prayers to God the Father Jesus Christ

other experiences ive had this month was the lost of appetite at times, and then the night my nostrils got blocked and i couldnt breathe and breathing through my mouth hurts my brain and i felt dying and God the Father Jesus Christ through dad helped me breath again then i got sick with fever the next day and was getting better then it turned into a cough and now writing this it turned into a chronic cough because of the liquid phlegm in my lungs, i dont know if theres any relation to what i read every evening from psalm 119 of being afflicted
